PROFESSIONAL SUMMARY

QA Engineer with 1.8+ years of combined professional and project experience in automation testing across UI, API, and BDD layers. Proven expertise in Selenium WebDriver, TestNG, Cucumber (BDD), C# + NUnit, and Java, integrated with Azure DevOps CI/CD pipelines. Delivered a 40% regression cycle reduction in a high-compliance healthcare insurance environment. Skilled in Test Planning, Test Strategy, cross-browser validation, and Agile SDLC collaboration.

EXPERIENCE

QA Engineer — Cognizant · Client: Humana Inc. (Healthcare Insurance)

Sep 2024 – Present

- Designed and automated 110+ end-to-end test cases across UI (Selenium WebDriver) and API (RestSharp) layers, cutting regression testing time by 40% per sprint.
- Built a reusable C# + NUnit framework using Page Object Model (POM) and Data-Driven Testing, reducing script maintenance by 30% and accelerating test scenario onboarding.
- Executed cross-browser validation across Chrome, Firefox, and Edge; generated Extent Reports dashboards per sprint for stakeholder defect visibility.
- Integrated automated suites into Azure DevOps Pipelines; managed test cycles and traceability matrices in qTest and JIRA to support healthcare compliance workflows.
- Collaborated with developers and BAs in Agile sprint planning to resolve edge cases early, reducing production defect leakage by 15%.

PROJECTS

E-Commerce BDD Automation Framework

2023 – 2024

Java · TestNG · Cucumber (BDD) · Selenium WebDriver · Jenkins | [GitHub](#)

- Architected a hybrid BDD framework using Java, TestNG, and Cucumber and Page Object Model (POM); covered 80+ scenarios across product, cart, and checkout flows using Data-Driven Testing via TestNG Data Providers.
- Configured Jenkins CI pipeline for nightly regression runs with Extent Reports; authored a full Test Plan and Test Strategy covering scope, entry/exit criteria, and risk assessment.
